In-Use Strategies to Control Emissions from Diesel Engines Workshop	ARB staff will discuss verification procedures used to evaluate diesel emission control strategies to satisfy the requirements of ARB's in-use fleet rules.	The workshop will be held in El Monte.	May 24, 2011
May Board Meeting	On May 26, the Board will hear: 1) a presentation on the status of adoption of a new 8-hour ozone ambient air quality standard by U.S. EPA and the potential impacts on possible nonattainment areas, with emphasis on the South Coast and San Joaquin Valley Air Basins, and trends in ozone air quality monitoring data for these areas; and 2) an update on CalNex 2010, a major climate and air quality field study in California conducted by the National Oceanic and Atmospheric Administration and the California Air Resources Board, with the participation of numerous academic researchers.	The Board Meeting will be in Sacramento.	
Specially Constructed Vehicle Certification Procedures Workshop	ARB staff will discuss a proposed certification path for specially constructed vehicles.	The workshop will be held in Sacramento.	May 31, 2011
Tractor-Trailer Greenhouse Gas Regulation Compliance and Reporting Seminars	ARB staff will provide training on the compliance and reporting requirements of the Tractor-Trailer GHG Regulation. This regulation requires aerodynamic devices and low rolling resistance tires on long box-type trailers and heavy-duty tractors that pull them on California highways. Large trailer fleets would need to report by July 1, 2011, to take advantage of the phase-in provisions.	The seminars will be held in El Monte.	June 9, 2011
