

U.S. GHG Inventory

Greenhouse Gas Emissions by Sector

United States, 2004

Total Emissions* = 7,074 MMT CO₂E

* Net Emissions (Sources + Sinks) = 6,204 MMT CO₂E

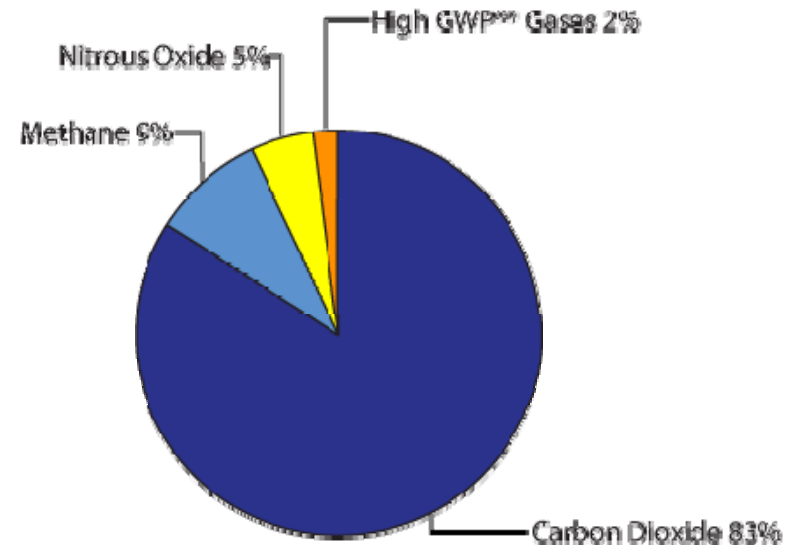

** High GWP Gases include: HFCs, PFCs, and SF₆

Data expressed in Million Metric Tons of Carbon Dioxide Equivalents (MMT CO₂E)

Source: US EPA Inventory of Greenhouse Gas Emissions and Sinks, 2006.

Greenhouse Gas Emissions

California GHG Inventory

California Greenhouse Gas Composition by Type of Gas in 2004
(Includes electricity imports and excludes international bunker fuels)

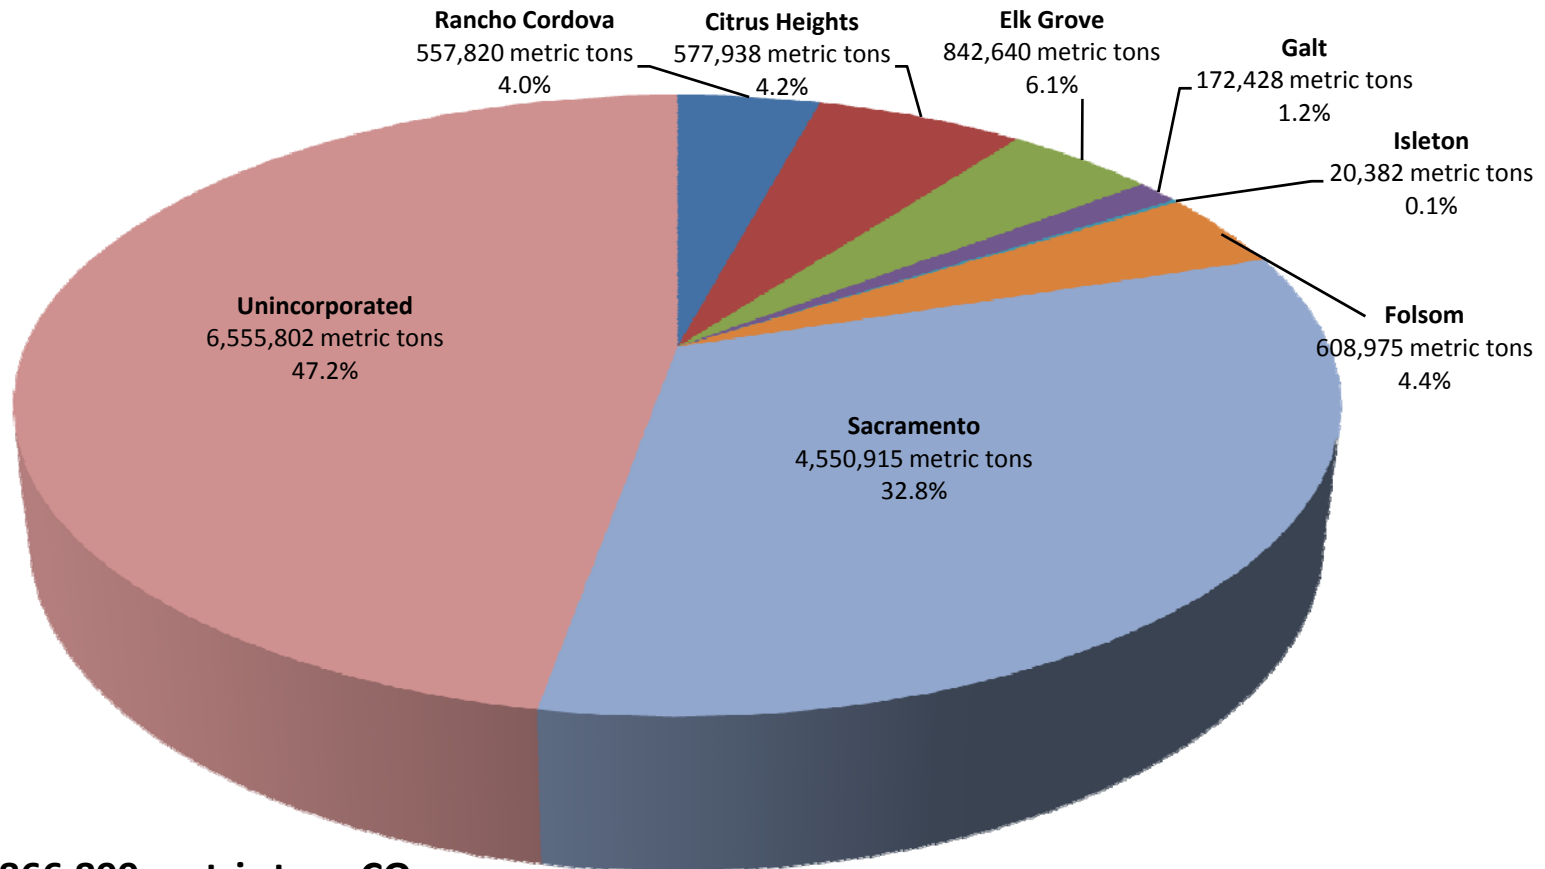

Sacramento County Emissions by sector (CO₂e)

Total: 13,934,627 metric tons CO₂e

* Includes off-road equipment, high GWP gases, industrial-specific, agriculture, wastewater treatment, and the Sacramento International Airport

Sacramento County Emissions by jurisdiction (CO₂e)

Total: 13,866,899 metric tons CO₂e

Total per capita emissions (CO₂e)
