**RE: Delta Shores Air Quality Mitigation Plan Endorsement**

Thank you for the opportunity to review the August 25, 2008 submittal of the Delta Shores Air Quality Mitigation Plan (AQMP). The AQMP exceeds the required 15 point emission reduction value by committing to an array of measures that achieves 18.347 emission reduction points.

The endorsement of the Delta Shores AQMP is the result of early consultation and regular communication between all parties involved. When implemented, this plan will help encourage future Delta Shores residents to choose alternate transportation modes. Additionally, the commitment represented by many of the measures in this AQMP provide a good example of operational mitigation measures at work; reducing vehicle miles traveled in the Sacramento area, and by extension improving air quality.

We look forward to working with you in the future and if at any time we can be of further assistance please contact me at 916.874 4883 or [cmcghee@airquality.org](mailto:cmcghee@airquality.org).

Sincerely,

Charlene McGhee  
Associate Air Quality Analyst
